

INSTRUCTIONS FOR TRANSPORT AND STORAGE OF THE KROP GUTTER SYSTEM

Long elements

1. Drain gutters and pipes must be stored and transported in a horizontal position.
2. Long elements can be stored in metal racks or on stands.
3. Sharp or angular edges that come into contact with gutters or pipes must be protected during transportation and storage to avoid mechanical damage.
4. The permissible storage height of the long elements in the stack is 1 m.
5. Pipes and gutters should be stored in plastic sleeves protecting the products against rain, dust and excessive sunlight.

Fittings of the gutter system

6. Cartons with fittings must be stored and transported under a roof.
7. Exposure to direct sunlight should be avoided for fittings packed in plastic bags

General principles

8. Unloading and loading of individual packages/cartons should be carried out manually with due diligence. Packaging must not be thrown or crushed.
9. During transport, the cargo should be secured with e.g. belts.
